

An  
Emerging  
Technology

# Telepresence

## Telepresence in business

✔ extremely efficient use of resources that permits unlimited access to people, transcending schedules and enlisting the expertise, skills, and abilities of experts around the world who otherwise might not have the opportunity to collaborate.

## Telepresence in education

Increasing ✔ Equity ✔ Accessibility

✔ refers to audiovisual technology that allows students and teachers to interact remotely and synchronously in conversations, classes and teamwork.

## Virtual Meetings

✔ is an application that uses VR-related technology to **virtually place the user somewhere else in space.**

✔ a process which enabled a person to safely control a vessel from the safety of a remote location.

## Emulating face-to-face interaction

✔ involves the use of technology to allow a person to feel, interact, and collaborate as if they were present at one location when in fact they are at a different location.

## Telepresence in patient care

✔ robots from a variety of manufacturers help elderly people remain in their homes for longer, staying connected to their careers, friends and family.
